of the house of WETTIN, which less than a hundred years ago was confined to a small portion of Germany, new rule over a greater extent of territory and over more people than any other family on earth. Besides the King of Saxony, the Grand Duke of Saxe Weimar and the Dukes of Saxe Meiningen, Saxe Altenburg and Saxe Coburg and Gotha, who have continued the line on their native soil, it includes the King of Great Britain and Ireland, the King of the Belgians, the King of Portugal, the Prince of Bulgaria and the young man who, but for the revolution which drove out his grandfather, would now be the Emperor Dom PEDRO III. of Brazil. The last five, with the Duke of Saxe Coburg, belong to a single branch of the family; they are the outcome of a series of successful marriages, extending over three generations, which can be compared only to the extraordinary succession of marriages by which the Hapeburg power was built up, which culminated in the Empire of CHARLES V.

Duke Francis of Saxe Coburg and Saalfeld, who died in 1806 after bankrupting his little State through obstinate litigation, had four children: ERNST L, his successor. who, in a family settlement, exchanged Snalfeld for Gotha, and continued the line; FERDINAND, who married the Princess of Kohary, an enormously wealthy Hungarian heiress; LEOPOLD and VICTORIA, who ultimately married the Duke of Kent and became the mother of Queen Victoria. The Duchess of Kent's brother LEOPOLD came near being Prince Consort of England for he was married to the Princess CHAR-LOTTE, only daughter and heiress of GEORGE IV. She died in childbirth, however, and LEOPOLD was subsequently made the first King of the Belgians, married a daughter of King Louis Philippe and became father Congo State. This is the more remarkable because in

terest and inquiry concerning questions of religion were never more active than they are now. Of the voluminous correspondence coming to us, the subject which enapparent in the line than there would be if gages the greatest part devoted to any single theme is religion. Last year we crinted for many weeks these voluntary discussions and they constituted the most of Hanover. Nobody in England thinks remarkable and in some respects the ablest debate on the questions treated which has appeared anywhere of recent years, yet so vast was the volume of this correspondence Nevertheless it is a curious fact that that we could not publish more than a comdescendants in the unbroken male line paratively few of the letters received, else we should have had room for little besides. Nor did this flood of correspondence on specific and general religious questions cease when we brought the debate to an end; it continues still to make up a larger body of our correspondence than concerns itself with any other subject. If a thoughtful suggestion touching religion is made in this paper it always bears fruit in many letters to us from every part of the Union, and the vast majority of them are from laymen and from religious believers rather than infidels. For example, the murderous assault by a husband on a New Jersey clergyman is now acting in that way, as also is the initiation of an organized movement to stimulate a religious revival in the Protestant "evangelical"

It appears then, that the decadence of the professional paper and periodical cannot be due to any lapse of interest in the us to fill the whole Srs with manifestations of the deepest and most carnest interest and sollcitude.
